Better Air
Australia

We have recently purchased BA 008 units from Better-Air Australia to be installed in all our new early learning centre's rooms.

Since the time these units have been operating, our staff have noticed a significant improvement in the freshness and general odour and hygiene of the rooms. The educators and children using these rooms have noticed a reduction in absenteeism from their allergies and illness. One of our team has also felt a noticeable improvement to her asthma symptoms and her general health and wellbeing. She has commented on how much better she feels and how much her breathing has improved since the units were installed.

Thank you to Better-Air Australia for approaching us to be a pioneer in introducing this product. Our centre, although brand new, has enjoyed the noticeable benefits of restoring the indoor ecological balance and we intend to use this product long term.

Sincerely yours
